

65083 - Assembly Instructions

Step 1. Feed clear tube through right side of the upper section until the black tip of tube is visible at the top, and attach tube to pump unit.

Step 2. Place base on a level surface and attach upper section with the included hardware and tool.

Step 3. Fill base with water until pump is fully submersed, route power cord to an outlet and plug in; unit runs continuously once powered. Maintain water level above submersible pump while running.
